Eyekenz® EDOF

Enhanced Depth of Focus

AMH-EDF-6125

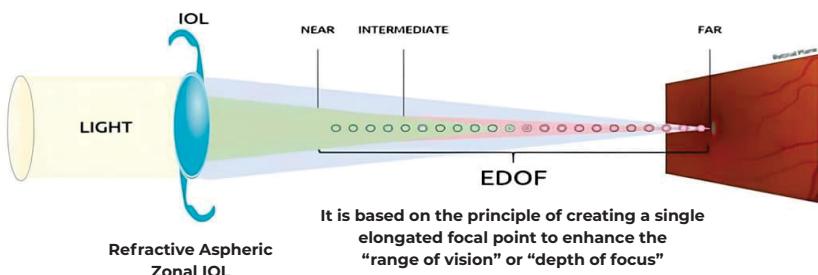

Yellow Hydrophobic Aspheric Foldable IOL with EDOF

Eyekenz EDOF is a single sterile **yellow hydrophobic aspheric foldable acrylic posterior chamber IOL with extended depth of focus (EDOF) technology.**

Eyekenz EDOF is based on the principle of creating a single elongated focal point to enhance the range of vision or depth of focus in the treatment of presbyopia-correcting IOLs. These IOLs enhance intermediate and near distance visual performance.

Eyekenz EDOF IOL contains UV absorber and optional blue light filtering chromophores.

Understanding EDOF

The EDOF IOL is non-preloaded IOL which has to be manually loaded into a compatible injector

Eyekenz® EDOF IOL

Technical Specifications

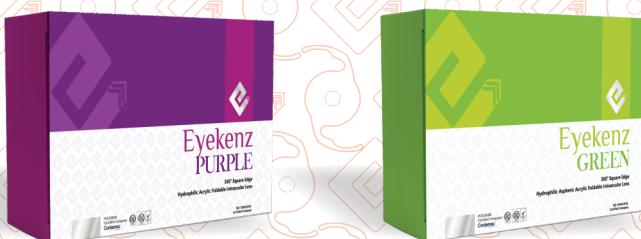

POWER RANGE	
Standard Powers	5.00 D -> + 30.0 D (0.5 D steps)
Intermediate Addition	+2.25 D, +2.50 D
MATERIAL	
Hydrophobic Acrylic blanks contain UV absorber with < 0.5% water content and optional blue light filtering Chromophore	
Refractive Index	1.493
Sterilization	Ethylene Oxide
DESIGN	
Optic Diameter	6 mm / 12.50 mm
Overall Diameter	
Optic Design	Biconvex - 360°; Square Edge with Refractive Optics
Nominal A-constant	118.8
Haptic Design	Single Haptics with 0° Angulation
PCO Prevention	360° Square Edge
Shelf Life	5 years after sterilization
INJECTION	
Estimated Incision Size	1.8 - 2.2 mm
Injector & Cartridge	Front Load with 2.2 mm Cartridge
CONSTANTS	
for optical and immersion ultrasound measurements	
SRK/T A-Constant	Hoffer Q
A = 118.8*	pACD = 5.61*
Haigis	Holladay I
a0 = 1.96*	SF = 1.85*
a1 = 0.400 *	
a2 = 0.100*	SRK/ II A-Constant
	A = 119.1

Eyekenz® IOLs

Hydrophobic IOL

Hydrophilic IOL

EDOF IOL

PMMA IOL

Only for the use of a Registered Medical Practitioner or a Hospital or a Laboratory
